About This Game

Due Process is a tactical FPS about planning and teamwork that rewards communication with teammates, allows players to draw a "playbook" directly onto the map during the planning phases, and presents a novel situation each play session thanks to a bounty of procedurally generated, hand-curated maps.

Play as a Bonded Unit

In **Due Process**, the only road to victory is teamwork. Each match begins with a planning session, providing teams an opportunity to gear up, discuss strategy over voice-chat and formalize tactics by drawing directly onto the map - like a playbook. Once the round begins, combat is quick and energetic - with one team on offense and the rival team defending a structure with multiple entry points.

Fresh Scenarios Each Match

Due Process introduces an evolution of the FPS scenario. Maps are procedurally generated, then expertly curated by the development team for maximum fun - resulting in a novel situation within each match, whether the outcome is victory or defeat. Due Process balances the playing field by making it more about outsmarting your opponent than memorizing a map, eliminating the inherent unfairness of “map knowledge.” With visuals inspired by 90s arcade light gun games like Time Crisis, Due Process uniquely marries neon-retro aesthetics and modern gameplay innovations.
